**PROFILE OF DEVELOPMENT AND RATES (PRICES)**

The profile of the development for which prices (rates) are required is an A-grade four storey office park development with approximately 10,000m<sup>2</sup> (gross building area) of offices and 8,000m<sup>2</sup> of basement parking two basement levels. The buildings have reinforced concrete flat roof slabs

A-grade is defined as being fully air conditioned and with high quality finishes

Rates (prices) are to be current market rates (prices) at the date stated and are to include for the cost of materials, waste, duties, transport, labour, plant and contractor's overheads and profit but should exclude any allowance for fluctuation (escalation), preliminaries, contingencies and VAT (or general sales tax)

The pricing levels should be for contractors who are capable of erecting a building of this size in a reasonable time whilst adhering to international quality

Note that information on preliminaries charges are called for separately

### **BILLS OF QUANTITIES RATES**

The following are rates (prices) related to typical bills of quantities items:

14. Excavation in earth for basement and deposit on site	m <sup>3</sup>	46.5
15. 30MPa/19mm reinforced concrete slabs including beams and inverted beams (excluding reinforcement and formwork)	m <sup>3</sup>	1300
16. Rough formwork to soffits of concrete slabs approximately 250mm thick including propping up (excluding concrete and reinforcement)	m <sup>2</sup>	240.5
17. High tensile steel reinforcement for concrete structure (excluding concrete and formwork)	ton	9450
18. One brick/225mm blockwork (or usual external wall thickness) superstructure walling (excluding reinforcement)	m <sup>2</sup>	298.92
19. Bituminous membrane waterproofing to flat roofs	m <sup>2</sup>	165
20. Partitions comprising aluminium frame with gypsum plasterboard both sides (excluding doors)	m <sup>2</sup>	600
21. 500 x 500mm Superior quality carpet tiles on screeded floors (excluding screed)	m <sup>2</sup>	580
22. Steel roof trusses including rafters, rails, struts, braces, etc	ton	26500
23. Internal cement plaster with gypsum or equivalent finish to brick or blockwork walls	m <sup>2</sup>	50.5
24. "Marmoran"/"Gamma Zenith" or similar sprayed on finish to external plastered walls (excluding external plaster)	m <sup>2</sup>	180
25. 600 x 600mm Glazed porcelain floor tiles fixed with adhesive to screed (screed elsewhere)	m <sup>2</sup>	380
26. One coat plaster primer and two coats acrylic (waterbased) paint on internal plastered walls	m <sup>2</sup>	50
27. Profit and attendance (together) on subcontracts nominated or selected by the employer (this is not for domestic subcontracts)	%	5

### **COMPONENT RATES**

The following items are not related to typical bills of quantities items but are derived from groupings of items:

28. Allowance for preliminaries including the cost of site establishment, plant and equipment and site management (expressed as a percentage of the total contract sum)	%	18
29. Powder coated aluminium shopfronts with clear laminated safety glass, including doors (but excluding rotating doors), ironmongery, sealant strips, etc	m <sup>2</sup>	2200
30. Complete electrical installation for the entire development including generators where generally applicable but excluding electronic installations such as access control, CCTV installations and building management systems, etc (expressed as a price (Rate) per gross building <u>area of offices only</u> )	m <sup>2</sup>	1000
31. Complete internal plumbing installation including geysers, sanitary fittings with taps, service traps, etc and including all water and waste pipes but excluding external plumbing and drainage (expressed as a price (rate) per sanitary point)	No	14500
32. Lift with 6 stops, approximately 1,60m/s speed and 13 person capacity	No	1100000

33. Complete centra VRV (variable refrigerant volume) air conditioning installation to offices (expressed as a price (rate) per air conditioned office area (excluding mechanical ventilation to basements)
